Preface

This year the 4th IASME / WSEAS International Conference on WATER RESOURCES, HYDRAULICS & HYDROLOGY (WHH '09) was held in the University of Cambridge as in 2008. The Conference remains faithful to its original idea of providing a platform to discuss theoretical and applicative aspects of water resources management, water quality, water pollution control, large river engineering and management, computational hydraulics etc. with participants from all over the world, both from academia and from industry.

Its success is reflected in the papers received, with participants coming from several countries, allowing a real multinational multicultural exchange of experiences and ideas.

During this last year we witnessed the growth of the European Union interest in water resources, hydraulics & hydrology. This is an additional proof that they are seen not only as an exciting research area but also as technologies that may solve current European citizens' concerns with several practical problems.

For a discipline which is central to research and also to industry, and which generates interests not only among academicians but also among large companies and government departments and agencies, it is important to look at the market and at its movements.

A Conference such as this can only succeed as a team effort, so the Editors want to thank the International Scientific Committee and the Reviewers for their excellent work in reviewing the papers as well as their invaluable input and advice.

The Editors

Table of Contents

Plenary Lecture: Using Exergy to Enhance Ecological and Environmental Understanding and Stewardship	10
<i>Marc A. Rosen</i>	
Efficiency of the Water Jets on Fire Interventions	11
<i>Dan Victor Cavaropol, Mircea Grigoriu, Valeriu Panaitescu, Doina Cornelia Dinu, Mariana Panaitescu</i>	
A Cellular-Based Genetic Algorithm for Groundwater Allocation	15
<i>E. Sidiropoulos, D. Fotakis</i>	
Photocatalytic Degradation of Wastewater Polluted by Methyl-Tertiary-Butylether using Titanium-Dioxide and Doped Titanium-Dioxide	19
<i>Natasa D. Kuburovic, Aleksandar Golubovic, Zaklina Todorovic, Slavica Gasic, Tatjana Solevic</i>	
Failure Mechanism in Geobag Structure	25
<i>Aysha Akter, Grant Wright, Martin Crapper, Gareth Pender</i>	
Comparison between Various Reference Evapotranspiration Equations for Semiarid Conditions	31
<i>Ramon Lopez-Urrea, Francisco Martin de Santa Olalla, Concepcion Fabeiro, Agueda Moratalla</i>	
Fall Velocity of Sediment Particles	39
<i>S. M. Sadat-Helbar, E. Amiri-Tokaldany, Steve Darby, A. Shafaie</i>	
Length and Orientation of Minor Spur in the Sand Bed	46
<i>A. Shafaie, A. Ardeshtir, S. M. Sadat-Helbar</i>	
Soil Properties Affecting Runoff in Calcareous Soils, Northwestern Iran	53
<i>A. R. Vaezi</i>	
Analysis of Infiltration and Water Redistribution in a Water Repellent Soil Monolith	59
<i>Mohammad Hossein Mohammadi, Marnik Vanclooster</i>	
Comparing the Model-Estimated Final Infiltration Rate with the Measured Saturated Hydraulic Conductivity in Laboratory	67
<i>Fereshte Haghighi, Manoochehr Gorji, Mehdi Shorafa</i>	
Asymptotic Matching with a Case Study from Hydraulic Engineering	71
<i>Jaber Almedeij</i>	
Modeling the Layouts of Stormwater Retention Ponds using Residence Time	77
<i>Sher Khan, Bruce W. Melville, Asaad Y. Shamseldin</i>	
Changes in River Hydrology and Coastal Sedimentation by Dams in Periyar River Basin Kerala, India	84
<i>G. S. Dwarakish, K. U. Abdu Rahiman, Usha Natesan</i>	
Equipment for Pollution Treatment of Impervious Surface Runoff Using Up-Flow Limestone and Geotextil Filtration Media	90
<i>Daniel Castro-Fresno, Jorge Rodriguez-Hernandez, Andres H. Fernandez-Barrera, Miguel A. Calzada-Perez</i>	
Enhancing Ecological and Environmental Understanding with Exergy: Concepts and Methods	94
<i>Marc A. Rosen</i>	

Simulation of Collecting Pipe and Its Drainage Rate at A. Landfill, Japan	104
<i>Dang Thuong Huyen, Kenji Jinno, Atsushi Tsutsumi</i>	
Assessment and Reduction of Hydro-Meteorological Model Forecasting Uncertainty using an Autoregressive Error Model and Bivariate Meta-Gaussian Density	110
<i>Renaud Hostache, Patrick Matgen, Mara Montanari, Christine Fosty, Laurent Pfister</i>	
Application of Truncated Plurigaussian Method for the Reactive Transport Modeling of a Contaminated Aquifer	119
<i>Claudia Cherubini, Concetta I. Giasi, Fausta Musci, Nicola Pastore</i>	
Flow Metering By End-Depth Method in Inverted Semicircular Channels	125
<i>Seyed Vahid Nabavi, Mohammad Karim Beirami, Mark Sterling</i>	
Turbulent Kinetic Energy reduction in Depressed Flexible Apron of Barrages	131
<i>Kapileswar Mishra, Dhruvajyoti Sen</i>	
Rural Micro-Watershed Management Through Spatial Decision Support System - A Case Study	136
<i>J. P. Shukla, Raghuvanshi Ram, R. N. Yadava</i>	
Depth-Damage Curve for Flood Damage Assessments Industrial and Commercial Sectors	141
<i>Ling-Fang Chang, Jui-Lin Kang, Ming-Daw Su</i>	
River Management: Use of Macrophyte Community Structure in UK Rivers as an Example for Ecological Assessment for Hydromorphological Impacts	147
<i>Rita S. W. Yam, Matthew O'Hare, Michael J Dunbar, Annette Baattrup-Pedersen, Soren E. Larsen</i>	
Flow and Sedimentation around Row of Circular Cylinder with Various Distances	152
<i>S. T. O. Naeeni, Kambiz F. Moghadam, Soheil Rezapour</i>	
Improving Water Supply Reliability through Portfolio Management: Case Study from Southern California	157
<i>Renee Kidson, Brent Haddad, Hui Zheng</i>	
The Study of Drought Phenomena in the Transylvania Plain using the Analysis of the Non-Periodical Variations of Precipitations	163
<i>Victor Sorocovschi, Mihai Voda</i>	
Time Evolution of Scour and Deduction of the Required Minimum Test Duration for a Clear-Water Scour Test at a Bridge Pier	168
<i>Patrick Alabi</i>	
Heavy Metal Uptake Kinetics of Microalgae in Aquatic Media	175
<i>Zehra Gok, Esra Yel</i>	
Effects of pH and Dissolved Organic Matter on the Formation of Disinfection By-Products by Chlorination and Chloramination	180
<i>Sezen Kucukcongar, Mehmet Faik Sevimli, Esra Yel</i>	
Estimation of Monthly Evaporation for Kovilar Reservoir using Genetic Programming and Thornthwaite Method	186
<i>K. S. Kasiviswanathan, S. Saravanan, Avinash Agarwal, S. Sathyamurthi</i>	

Effects of Rainwater Harvesting and Desalination on Supply and Demand of Public Water in U.S. Virgin Islands <i>Hossana Solomon</i>	191
Numerical Modeling of Extended Mild Slope Equation with Mac Cormack Method <i>Asu Inan, Lale Balas</i>	195
Nested SIS Algorithm for a Stochastic Geolithologic Characterization of Heterogeneous Aquifer <i>Claudia Cherubini, Concetta I. Giasi, Fausta Musci, Nicola Pastore</i>	201
Drip Irrigation with Saline Water in North China Plain <i>Kang Yaohu, Wan Shuqin, Chen Ming</i>	207
GPS Oriented System for Evaluation of Energetic Potential of Hydroelectric Dam Lakes <i>Sorin Dan Grigorescu, Costin Cepisca, Octavian Mihai Ghita, Mircea Covrig, Elena Grigorescu</i>	218

Plenary Lecture

Using Exergy to Enhance Ecological and Environmental Understanding and Stewardship

Professor Marc A. Rosen

Founding Dean

Faculty of Engineering and Applied Science
University of Ontario Institute of Technology
Oshawa, Ontario, CANADA

also: President-Elect, Engineering Institute of Canada

Email: M.Rosen@uoit.ca

Abstract: In efforts to understand ecological systems and environmental impact, techniques can be used which combine thermodynamics with environmental and ecological disciplines. Most such assessments consider thermodynamics in terms of energy, but it is believed by many that ecological and environmental factors are better understood using the thermodynamic quantity exergy. One rationale for this statement is that exergy, but not energy, is often a measure of the potential for ecological and environmental impact.

Here, a summary is presented of existing analysis techniques which integrate exergy and ecological and environmental factors, including exergy-based ecological indicators, exergy-based life cycle analysis and environomics. The goals of most such analysis techniques include improving our understanding of the impact on ecological systems and the environment of processes and the determination of appropriate ecological and environmental improvement measures. Several examples are considered, including the application of exergy to water-based ecosystems for understanding, predicting and improving their health. Thermodynamic, ecological and environmental data are examined, and show that correlations exist between exergy and environmental and ecological parameters. The existence of such correlations likely implies that exergy factors into environmental improvement and ecological stewardship.

Brief Biography of the Speaker: Dr. Marc A. Rosen is a Professor of Mechanical Engineering at the University of Ontario Institute of Technology in Oshawa, Canada, where he served as founding Dean of the Faculty of Engineering and Applied Science from 2002 to 2008. Dr. Rosen became President of the Engineering Institute of Canada in 2008. He was President of the Canadian Society for Mechanical Engineering from 2002 to 2004, and is a registered Professional Engineer in Ontario.

With over 60 research grants and contracts and 500 technical publications, Dr. Rosen is an active teacher and researcher in thermodynamics, energy technology (including cogeneration, district energy, thermal storage and renewable energy), and the environmental impact of energy and industrial systems. Much of his research has been carried out for industry.

Dr. Rosen has worked for such organizations as Imatra Power Company in Finland, Argonne National Laboratory near Chicago, and the Institute for Hydrogen Systems near Toronto. He was also a professor in the Department of Mechanical, Aerospace and Industrial Engineering at Ryerson University in Toronto, Canada for 16 years. While there, Dr. Rosen served as department Chair and Director of the School of Aerospace Engineering.

Dr. Rosen has received numerous awards and honours, including an Award of Excellence in Research and Technology Development from the Ontario Ministry of Environment and Energy, the Engineering Institute of Canada's Smith Medal for achievement in the development of Canada, and the Canadian Society for Mechanical Engineering's Angus Medal for outstanding contributions to the management and practice of mechanical engineering. He is a Fellow of the Engineering Institute of Canada, the Canadian Academy of Engineering, the Canadian Society for Mechanical Engineering, the American Society of Mechanical Engineers and the International Energy Foundation.
