Preface

This year the 2nd WSEAS International Conference on BIOMEDICAL ELECTRONICS and BIOMEDICAL INFORMATICS (BEBI '09) was held in Moscow, Russia, in August 20-22, 2009. The Conference remains faithful to its original idea of providing a platform to discuss biomedical circuits, biomedical devices, biomedical electronics, biomedical signal processing, biomedical applied electromagnetics, biomedical informatics etc. with participants from all over the world, both from academia and from industry.

Its success is reflected in the papers received, with participants coming from several countries, allowing a real multinational multicultural exchange of experiences and ideas.

The accepted papers of this conference are published in this Book that will be indexed by ISI. Please, check it: www.worldses.org/indexes as well as in the CD-ROM Proceedings. They will be also available in the E-Library of the WSEAS. The best papers will be also promoted in many Journals for further evaluation.

A Conference such as this can only succeed as a team effort, so the Editors want to thank the International Scientific Committee and the Reviewers for their excellent work in reviewing the papers as well as their invaluable input and advice.

The Editors

Table of Contents

Plenary Lecture 1: Present Situation and Future Trends of Omics-Based Medicine and Systems Pathology <i>Hiroshi Tanaka</i>	12
Plenary Lecture 2: Complexity Analysis of Signals and Images in Biomedicine <i>Tuan D. Pham</i>	13
A Porcine Lung SLPI WAP 2 Fragment Inhibits Trypsin by Sharing the Preserved Antielastase Reactive Site P1' Met 73 and P2' Leu 74 <i>Sandra De Cassia Dias, Isabel De Fatima Correia Batista, Dmitri Iourtov, Rafael Ferraz Alves, Isaias Raw, Flavia Saldanha Kubrusly</i>	15
Modeling and Simulation of Single Phase Double Capacitors Induction Motor <i>Sameer H. Khader</i>	21
Quick and Reliable Diagnosis of Stomach Cancer by Artificial Neural Network <i>Saeid Afshar, Fahime Abdolrahmani, Fereshhte Vakili Tanha, Mahin Zohdi Seaf, Kobra Taheri</i>	28
Development of Anesthesia Depth Index Using SEF, BDR and BTR <i>S. W. Baik, S. Y. Ye, J. M. Park, S. M. Park, G. R. Jeon</i>	34
Development of BDR and BTR on Depth of Anesthesia Using Power Spectrum Density Analysis <i>G. R. Jeon, J. M. Park, S. W. Baik, S. Y. Ye</i>	37
Computer Simulation Studies of Abnormal Protein Aggregation <i>Andrew Hung, Nevena Todorova, Irene Yarovsky</i>	41
Understanding Predictability of Bio-Signals Using Genetic Algorithms and Sample Entropy <i>Cuong C. To, Tuan D. Pham</i>	47
A Prebiotic Photochemical Synthesis of Glycerides <i>N. Aylward</i>	52
Cardiac Arrhythmia Help – Diagnosis System Using Wavelets and Hidden Markov Models <i>Pedro R. Gomes, Filomena O. Soares, J. H. Correia, C. S. Lima</i>	60
Human Tissue Information Processing <i>Jelenka Savkovic-Stevanovic</i>	64
Data Bases General Health Data Processing <i>Jelena Lukic, Snezana Adzemovic</i>	70
DNA Association and Dissociation <i>Jelenka Savkovic-Stevanovic</i>	76
Disease Distribution Modelling <i>Jelena Lukic</i>	82
Support System for Breast Cancer Treatment <i>Snezana Adzemovic</i>	88

Experimental Strain Field Distribution in Ankle-Foot Orthosis (AFO)	94
<i>Valentin Oleksik, Adrian Pascu, Cristian Deac, Radu Fleaca, Mihai Roman</i>	
Refinement on O Atom Positions for Protein Backbone Prediction	99
<i>Hsiao-Yen Chang, Chang-Biau Yang, Hsing-Yen Ann</i>	
Mathematical Modeling of the Informative Process in the Biosensor of Angular Acceleration	105
<i>V. V. Alexandrov, T. B. Alexandrova, G. Castillo, G. Sidorenko, A. Ortega, R. Vega, E. Soto</i>	
A Prebiotic Surface Catalysed Synthesis of Alkyl Imines	111
<i>Nigel Aylward</i>	
Teledermatology: Digital Revolution in the Management of Skin Disease	117
<i>S. Oikonomou</i>	
Genetic Information in Biopolymeric Chain	122
<i>Jelenka Savkovic-Stevanovic</i>	
Real Time Telemonitoring of Medical Vital Signs	127
<i>Hariton Costin, Cristian Rotariu, Ioana Alexa, Gina Constantinescu, V. Cehan, B. Dionisie, Gladiola Andrusac, D. Arotaritei, B. Mustata, Octavia Morancea, F. Adochiei, R. Ciubotariu, E. Crauciuc, Monica Scutariu</i>	
Local Method in Computer Modeling of Mechanoreceptor From Vestibular System	136
<i>A. Grebennikov, V. Alexandrov, E. Soto, G. Castillo</i>	
Odontogenesis- a Highly Complex Cell-Cell Interaction Process	143
<i>Ambrish Kaushal, Mala Kamboj</i>	
The Papain Pocket Delivery Impairs the Capsule Fibrous Healing Around Textured Silicone Implants in Rats.	148
<i>Marcio Moreira, Djalma Jose Fagundes</i>	
Some Quantitative Aspects of ³¹p Magnetic Resonance Spectroscopy In Vivo in an Exercise Physiology Context	154
<i>Bjorn Quistorff</i>	
LED-Based Liquid Cryogen Level Measurement	161
<i>Ali Umit Keskin, Cihat Koyuncu</i>	
New Acoustic Devices for Breathing Investigations	165
<i>Semyon Shkundin</i>	
Fragmentomics: a New Insight into Structures and Functions of the Natural Oligopeptide Diversity	170
<i>Alexander A. Zamyatnin</i>	
Collagen Molecule as a Precursor of Regulatory Peptides	177
<i>V. P. Ivanova, Z. V. Kovaleva, A. I. Krivchenko</i>	
Whole Genome Transcriptional Profiling of The Mouse Frontal Cortex Following Repeated Acamprosate Administration	180
<i>Megan P. Hicks, M. Foster Olive</i>	

Ontology Development for a Patient Monitoring Framework	184
<i>J. Bravo, V. Villarreal, R. Hervas, C. Sanchez, S. Lopez, A. Diez, C. Fuentes, J. Laguna</i>	
Real Time Characterisation of Neural Signals with Application to Neonatal Monitoring	189
<i>Liviu Moraru, Guenter Edlinger, Christoph Guger, Anastasios Bezerianos, Dirk Hoyer</i>	
Composition of Flexible Wireless Sensing Device for Human and Homecare Network	193
<i>H. Hocheng, C. M. Chen, R. S. Chen, W. Fang</i>	
Fractal Dimension and Lacunarity of Psoriatic Lesions - A Colour Approach -	199
<i>M. Ivanovici, N. Richard, H. Decean</i>	
New Paradigms for Clinical Engineering and Health Technology Assessment: Case Studies in Mexico	203
<i>L. Fabiola Martinez, L. Joaquin Azpiroz, Rene Guadarrama, M. Miguel Cadena</i>	
Protein Domain Boundary Prediction from Residue Sequence Alone using Bayesian Neural Networks	209
<i>David Sanchez, Spiros H. Courellis</i>	
Epidemiological Impact of Data Management on Prevention the Accidents Caused by Exposure to Blood in Healthcare Units	214
<i>Gratiana Chicin, Antoanela Naaji, Dana Brehar Cioflec, Corina Valea</i>	
Developing Mobile Ubiquitous Services for the Elderly using Virtual Environments	219
<i>Z. Asghar, S. Hickey, S. Kazmi, P. Pulli</i>	
Quantitative Immunologic Assessments of the Kidney Inflammatory Infiltrate in Sepsis	226
<i>Laurian Lucian Francu, Eduard Crauciuc, Claudia Cristina Tarniceru, Scutaru Monica, Doina Lucia Frincu</i>	
Modelling of Mixing in Bioreactors with Mobile Beds of Immobilized Biocatalysts for Six Radial Impellers	232
<i>Marius Turnea, Anca Lupasteanu, Anca-Irina Galaction, Dan Cascaval</i>	
Bioreactors of "Basket" Type with Immobilized Biocatalysts	238
<i>Roxana Baltaru, Anca-Irina Galaction, Dan Cascaval</i>	
X-Ray Based Technique for Estimating Bone Fracture Risk	244
<i>V. Volpe, C. Miraglia, L. Esposito, M. Fraldi</i>	
The Simulation of a Stochastic Model for Tumour-Immune System	247
<i>Raluca Horhat, Raul Horhat, Dumitru Opris</i>	
Development of a Microfluidic Fluorescence Immunosensor for Point-of-Care Diagnostics	253
<i>Mohammad Faghri, Peng Li</i>	
Improving Efficiency in Patient Identification and Monitoring Using RFID and Multi-Agent Technologies	259

Plenary Lecture 1

Present Situation and Future Trends of Omics-Based Medicine and Systems Pathology

Professor Hiroshi Tanaka
School of Biomedical Sciences
Tokyo Medical and Dental University
JAPAN
E-mail: tanaka@cim.tmd.ac.jp

Abstract: A new perspective for personalized and predictive care which clinical omics and bioinformatics cooperatively open will be presented, with emphasis on promising possibilities which “omics-based personalized care” is thought to bring about. In doing so, we take it into consideration that, along the rapid progress of the omics and bioinformatics, the contents of “genome/omics-based personalized care” have evolved, mainly through three generations. The first generation is personalized care based on (1) the polymorphism of the “germline” genome sequences, such as personalized medication depending on the individual genetic differences concerning the pharmacodynamics/pharmacokinetics or estimation of genotype relative risk for individual’s disease occurrence, the second generation is that based on (2) the information pattern of vast amount of omics data of diseased “somatic” cell, which brings about detailed classification, early diagnosis and prognosis of the disease, and the third generation is that based on (3) the system level understanding of complex diseases which enables wholistic comprehension of the mechanism of diseases, with special reference to disease pathway.

Brief Biography of the Speaker:

Date of birth: September 15, 1949

Home address: 4-29-14 Hakusan, Bunkyo-ku, Tokyo, Japan 112-0001

Affiliation: Professor, Department of computational biology, School of Biomedical sciences, Department of bioinformatics

Medical Research Institute

Dean, Biomedical science PhD program

Director, Information Center for Medical Sciences

Tokyo Medical and Dental University

Phone: +81-3-5808-5839

E-mail: tanaka@cim.tmd.ac.jp

Education

1974: Graduated from Department of Mathematical Engineering Faculty of Engineering, University of Tokyo

1976: Received Master of Engineering from the Graduate School of Engineering, University of Tokyo

1981: Received Doctor of Medical Science from Graduate School of Medicine, University of Tokyo

1983: Received Ph.D. from Graduate School of Engineering, University of Tokyo

Academic career

1982-1987: Assistant Professor at the Institute for Medical Electronics, School of Medicine, University of Tokyo

1982-1984: Visiting Scientist, at Uppsala University and Linkoping University, Sweden

1987-1991: Associate Professor, Hamamatsu University School of Medicine

1990: Visiting scientist in MIT Laboratory of Computer Science

1991-2003: Professor of bioinformatics, Medical Research Institute, Tokyo Medical and Dental University

1995-now: Director of Information center for Medicine, Tokyo Medical and Dental University

2003-now: Professor of computational biology, School of Biomedical Sciences, Tokyo Medical and Dental University

Plenary Lecture 2

Complexity Analysis of Signals and Images in Biomedicine

Professor Tuan D. Pham

ADFA School of Information Technology and Electrical Engineering
The University of New South Wales
Canberra, ACT 2600, Australia
E-mail: t.pham@adfa.edu.au

Abstract: Measuring the complexity of a pattern expressed either in time or space has been introduced to quantify its information content, which can then be applied for classification. Such information measures are particularly useful for the understanding of systems complexity in many fields of sciences, business and engineering. This talk presents recent work on the concepts of geostatistical entropy and fuzzy fractals as the measures of pattern complexity and similarity in bio-signals, molecular and biomedical images. These measures can be useful tools for extracting temporal signatures of biological and physiological time series data, and quantifying morphological changes in cell and brain images.

Brief Biography of the Speaker: Tuan D. Pham received his PhD degree in 1995 from the University of New South Wales. His current research interests include image processing, molecular and medical image analysis, pattern recognition, bioinformatics, biomedical informatics, fuzzy-set algorithms, genetic algorithms, neural networks, geostatistics, signal processing, fractals and chaos. His research has been funded by the Australian Research Council, academic institutions, and industry. Dr. Pham is an editorial board member of several journals and book series including Pattern Recognition (Elsevier), Current Bioinformatics (Bentham), Recent Patents on Computer Science (Bentham), Proteomics Insights (open access journal, Libertas Academica Press), Book Series on Bioinformatics and Computational BiImaging (Artech House), invited Regional Editor of International Journal of Computer Aided Engineering and Technology (Inderscience Publishers), and invited Editor-in-Chief of WSEAS Transaction on Biology and Biomedicine. He has been serving as chair and technical committee member of more than 30 international conferences in the fields of image processing, pattern recognition, computational intelligence, and computational life sciences.
