Preface

On behalf of the Program and Operating Committees of the 3rd WSEAS International Conference on CIRCUITS, SYSTEMS, SIGNAL and TELECOMMUNICATIONS, we are pleased to welcome you to attend the CISST'09.

The conference will be held on January 10-12, 2008 at Zhejiang Wanli University, Ningbo, China. The scope of the Conference covers all the aspects of Circuits, Systems, Signal and Telecommunications.

Ningbo is a seaport sub-provincial city with a population of 1,219,900 in northeastern Zhejiang province, People's Republic of China. Lying south of the Hangzhou Bay, and facing the East China Sea to the east, Ningbo borders Shaoxing to the west and Taizhou to the south, and is separated from Zhoushan by a narrow body of water.

Ningbo was one of China's oldest cities with a history dating back to 4800 B.C. the Hemudu culture. Ningbo was known as a major trading port along with Yangzhou and Guangzhou in the Tang dynasty; thereafter, the major ports for foreign trade in the Song dynasty. Ningbo was one of the five Chinese treaty ports opened by the Treaty of Nanjing (signed in 1842) at the end of the First Opium War between Britain and China. During the war, British forces took possession of the walled city of Ningbo briefly after storming the fortified town of Zhenhai at the mouth of the Yong River on October 10, 1841. In 1864 the forces of the Taiping Rebellion held the town for six months. Ningbo was once famed for traditional Chinese furniture production.

Zhejiang Wanli University (ZWU), situated in Ningbo Higher Education Zone, covers a total area of 951,809 square meters and consists of Huilong Campus and Qianhu Campus. ZWU has a very beautiful campus that is well-equipped, widely recognized by people from the education circle. In ZWU, there are Junior College, Business School, Law School, Faculty of Culture and Media, Faculty of Foreign Languages, Faculty of Art and Design, Faculty of Biological and Environmental Sciences, Faculty of Electronic and Information Engineering, Faculty of Computing and Information Technology as well as World College, Adult Education College, with 27 specialties of undergraduate (4-year program) and 30 specialties offering associate degree (3-year program), which contains such disciplines as economics, law, literature, science, engineering, agriculture and management. At present, the total number of full-time students at ZWU is over 16,000.

The accepted papers of this conference are published in this Book that will be indexed by ISI. Please, check it: www.worldses.org/indexes as well as in the CD-ROM Proceedings. They will be also available in the E-Library of the WSEAS. The best papers will be also promoted in many Journals for further evaluation.

Only in September of 2008, 21 (twenty one) books from WSEAS Press included in ISI: http://worldses.org/indexes. A very strong and important feature is that the WSEAS is going to give you a new username and password without expiry date for on-line access in the WSEAS Conference proceedings for ever. Several University Faculty Members and Senior Researchers that will be with us in the Conference will be invited as Members in the International Scientific Committee of the same conferences of WSEAS in 2009.

The WSEAS
Table of Contents

Improving Voice Activity Detection Used in ITU-T G.729.B
H. Farsi, M. A. Mozaffarian, H. Rahmani 11

Modifying Voice Activity Detection in Low SNR by correction factors
H. Farsi, M. A. Mozaffarian, H. Rahmani 16

ECG Pattern Classification Based on Generic Feature Extraction
Hee-Soo Park, Soo-Min Woo, Yang-Soo Kim, Bub-Joo Kang, Sang-Woo Ban 21

Multilevel Minimum Cross Entropy Threshold Selection based on Honey Bee Mating Optimization
Ming-Huwi Horng 25

Out-of-Band Cooperative Spectrum Sensing in Cognitive Radio System of Multiple Spectrum Bands
Bub-Joo Kang, Hee-Soo Park, Yang-Soo Kim, Soo-Min Woo, Sang-Woo Ban 31

Intelligent Radio Monitoring System for Efficient Spectrum Management
Hyun-Seok Yim, Yun-Ho Lee, Kyung-Seok Kim 35

Enhancement of Heat dissipation of Desktop Computer Chassis
S. Kong Wang, Juin Haw Hu 40

A New Simulated Annealing Algorithm for Terminal Allocation
Zengnian Zhang, Xudong Ke 47

Research on the Dynamic Model of Two Head Faces Elastic Spiale in Relative Rotation
Zunyi Wang, Ligang Lu, Kun Wang 51

Distributed Remote Laboratory using Web Services for Embedded System
Yin Wei-Feng, Sun Rong-Gao, Wan Zhong 56

A Sampling-based Scheduling Method for Distributed Computing
Jifang Li 60

A Novel Hurricane Model for Software Engineering
Xuejun Liu 66

Research on the Relationship of Tie Modality of Interfirm Network and Technological Innovation
Xinmin Peng 71

Key Technology Research and Analysis of H.264/AVC Suitable for Wireless Network
Yun-Peng Liu, San-Yuan Zhang, Shu-Chang Xu, Yin Zhang 76

Research and Application of SQLite Embedded Database Based on ARM-Linux
Bi Chun-Yue 81

Mechanism Disquisition of De-rusting By Ultra-high Pressure Waterjet
Fang Yuefeng, Wang Xiaoyong 86
A New Topological Formula and an Algorithm for Computing ST Reliability of Wireless Networks
Fei Gao, YinQiu Yang, HaoLiang Hu, JiangGang Yang

Innovative Design Service Platform of Agile Virtual Enterprise Supported by Semantic Web Services
Zheng Lei-Na, Ye Tao, Pan Tie-Jun, Zhang Hua-Jun, Shao Zhong, Lou Jie

The Optimal Stopping Times of American Call Options
Guangqin Li

On the Improved Gauss-Seidel method for Linear Systems
Qingbing Liu

Research on Personalization E-Learning System Based on Agent Technology
Zhen Liu, Yuying Liu

Research and Design of Meter Reading System
Sun De-Chao, Zheng Shao-Hua

Greenhouse Temperature and Humidity Intelligent Control System
Sun Rong-Gao, Wan Zhong, Sun De-Chao

Research of Multi-interface Data Encryption Equipment Based on Mobile Terminal
Zhong Wan, Weifeng Yin, Ronggao Sun

Real-Time Simulation of 3D Smoke on GPU
Qing Yang

Research on Anycast Routing Algorithm Based on Genetic Algorithm
Zhu Chun, Jin Min

Important Properties of Planar Normal Tiling
Hao Li

A Pilot Study of Meaning of Information in Information Systems based on Heidegger’s Work on ‘Being’
Ping Cang, Sufen Wang

An Efficient Conic Curve Threshold Digital Signature
Xinxia Song, Zhigang Chen

Double-Loop Temperature Control of an On-Off Heating System
Chih-Yuan Lin, Chien-Yuan Juan

Different Wideband Direction of Arrival (DOA) Estimation methods: An Overview
Sandeep Santosh, O. P. Sahu, Monika Aggarwal

Comparison of T-Shaped Microstrip Antenna and U-Shaped Microstrip Antenna
Mohamed Ismaeel, T. Jayanthy

Generic Characteristic Analysis on Traction Substation Operation
Hongsheng Su
Modulation Technique for Software Defined Radio Application  
Muhammad Islam, M. A. Hannan, Salina Abdul Samad, Aini Hussain  

Transformer Fault Diagnosis Method Based on Rough Set and Bayesian Optimal Classifier  
Hongsheng Su
