Table of Contents

Plenary Lecture 1: On the Measurements of 3D Sound Propagation in Historical Theatres	10
<i>Lamberto Tronchin</i>	
Plenary Lecture 2: On Cognitive Robotics and Theories of Abstract Intelligence	11
<i>Yingxu Wang</i>	
Determination of a Vertical Profile of Black Carbon by a Combined Application of a Light Research Aircraft and a Quadcopter Unmanned Aerial Vehicle – A Case Study Using an Airborne Ultraportable Micro-Aethalometer for Black Carbon Measurements at a Rural Site in Germany	13
<i>Konradin Weber, Tobias Pohl, Christian Fischer, Martin Lange, Christoph Böhlke</i>	
Earthing of Electrical Devices and Safety	19
<i>Jože Pihler</i>	
Quality Analysis of 3D Reconstruction in Underwater Photogrammetry through DoE-Based Regression	24
<i>Antonio Lanzotti, Antonio Lepore, Massimo Martorelli</i>	
The Application of Laryngograph in Research of Quality of Speech Signal. The Electroglotography Method	30
<i>Jolanta Zielińska, Ewa Brzdęk</i>	
Kitchen Activities Recognition Using Inertial Sensors	36
<i>R. Arpaia, R. Blasco, R. Casas, D. Buldain, A. Asensio</i>	
Loading Control of Complex Conveyor System	43
<i>Peep Miidla, Jens Haug</i>	
New Peak Signal-to-Blur Ratio (PSBR) Algorithm for Performance Evaluation of Image Filters	51
<i>Fabrizio Russo</i>	
Influence of CMS Type Used on the Performance of a PSA Generator	58
<i>Ivan Szilva, Dagmar Cagánová, Manan Bawa</i>	
Simulation of the Vessels Automatic Sea-Going Regulation	63
<i>Joško Dvornik</i>	
Neural Networks Using Reinforcement Learning and their Applications to Time Series Forecasting	69
<i>Takashi Kremoto, Keiko Ko, Masanao Obayashi, Shingo Mabu, Kunikazu Kobayashi</i>	
Design, Realization and Modeling of a Two-Wheeled Mobile Pendulum System	75
<i>Ákos Odry, István Harmati, Zoltán Király, Péter Odry</i>	
Computational Primitive to Model the Emergence of Behavioral Patterns	80
<i>Maria Teresa Signes Pont</i>	

Continuity Diagram Analysis at Open Loop and Closed Loop to Improve the Operability of a Bioreactor	105
<i>Bartolomeo Cosenza, Michele Miccio, Paola Brachi</i>	
Optimizing Dimensional Accuracy of Fused Filament Fabrication Using Taguchi Design	110
<i>Zoi Moza, Konstantinos Kitsakis, John Kechagias, Nikos Mastorakis</i>	
About Visual Sensory Substitution	115
<i>Dragos Moraru, Costin-Anton Boiangiu</i>	
Ensamble WiSARD Object Tracker: a RAM-Based Neural Network	125
<i>Rodrigo Da Silva Moreira, Nelson Francisco Favilla Ebecken</i>	
Missing Data Reconstruction in Acoustic Level Long Term Monitoring	135
<i>Claudio Guarnaccia, Joseph Quartieri, Carmine Tepedino, Ljiljana Petrovic</i>	
Combination of Bone-Conducted Speech with Air-Conducted Speech Changing Cut-Off Frequency	142
<i>Tetsuya Shimamura, Fumiya Kato</i>	
Enhanced PSS Based LQG Controller and Kalman Filter Adapted by Genetic Algorithm to Improve Robustness Stability	148
<i>Ghouraf Djamel Eddine, Naceri Abdellatif, Horch Abdessamad</i>	
Structure of Quasi Optimal Algorithm for Analog Circuits Optimization	154
<i>Alexander Zemliak</i>	
Validation of Railway Electric Simulator Using Scale and Slope Performance Indexes	160
<i>Jacopo Bongiorno, Andrea Mariscotti, Nicola Pasquino</i>	
Control Systems Base on Genetic Algorithms and Fuzzy Logic for the Application in Industrial Processes	167
<i>Juan C. López H., Iván F. Mondragón B.</i>	
Incorporating the UPFC in Large-Scale Power System for the Study of Power Flow and Voltage Profile	175
<i>Djilani Kobibi Youcef Islam, Hadjeri Samir, Djehaf Mohamed Abdeldjalil</i>	
Self-Mixing Interferometer for Contactless Vibration Measurements	182
<i>Alessandro Magnani, Dario Melchionni, Alessandro Pesatori, Michele Norgia</i>	
MoCap – The Advantages of Accelerometers and Accuracy Improvement	190
<i>Nikolay Todorov Kostov, Slava Milanova Yordanova, Yassen Dimchev Klchev</i>	
The Vibrato on String Instruments: Interaction Between FM and AM	197
<i>Lamberto Tronchin, Stefano Rizzelli</i>	
Stability Test of NaI(Tl) Scintillation Detector for Application of Gamma-Ray Tomography	203
<i>Yvette Shaan-Li Susiapan, Ruzairi Abd. Rahim, Rasif Mohd. Zain</i>	

Phase Shifter Prototype for Active Electronic Scanned Array Applications with 10-bit Resolution	207
<i>Giovanni Piccinni, Nicola Margiotta, Gianfranco Avitabile, Giuseppe Coviello</i>	
Measures of Attenuation High Frequency: Application to Variable Attenuators	213
<i>Nadia Fezai, Abdessattar Ben Amor</i>	
Controlling and Monitoring the Boiler Appliances through Web	217
<i>M. Kanmani, V. Vanitha</i>	
Dynamic Modeling of Three Phase Asynchronous Motor	223
<i>Dorjsuren Yandagsuren, Tumenbayar Lkhagvatseren, Tsevegmid Jamyankhorloo</i>	
Design and Implementation of a Device which Supports Wireless Real Time Video Transmission and Half Duplex Voice Communication	230
<i>J. K. Saha, Md. M. A. Ghuri, T. A. Chowdhury, M. J. Hossain, Md. M. R. Mamur, M. A. M. Ansary, B. Paul</i>	
Hybrid PSS - Statcom Control Designing to Improve Power Stability of Multi-Machine System	240
<i>Horch Abdessamad, Naceri Abdellatif, Ghouraf Djamel Eddine</i>	
Analysis of a Shunt Active Power Filter for Mitigation of Harmonics Caused by Compact Fluorescent Lamps	244
<i>Khurram Hashmi, Tahir Izhar</i>	
A Novel Leakage Reduction Doind Approach For Nanoscale Domino Logic Circuits	249
<i>Ambika Prasad Shah, Vaibhav Neema, Shreeniwas Daulatabad</i>	
The Optimal Placement of Wind - Solar Hybrid Power Plant Using Hybrid Particle Swarm Optimization (HPSO) in order to Reduce Losses in the City of Anar	253
<i>Houman Gadari, Fariba Rezazadeh</i>	
Design and Implementation of a Cost Effective, Portable and Scalable Electronic Weather Station	257
<i>S. H. Parvez, J. K. Saha, M. J. Hossain, H. Hussain, Md. M. A. Ghuri, T. A. Chowdhury, Md. M. Rahman, N. Z. Shuchi, A. Islam, M. Hasan, B. Paul</i>	
Obstacle Avoiding Slew Aware Clock Tree Synthesis	265
<i>Ravi S., Chandrahassa Reddy D., Sumanth Kumar, Harish M. Kittur</i>	
A Robust Power System Stabiliser Based on LQG Control	273

Plenary Lecture 1

On the Measurements of 3D Sound Propagation in Historical Theatres

Professor Lamberto Tronchin

DIN - CIARM

University of Bologna

Italy

E-mail: Lamberto.tronchin@unibo.it

Abstract: The definition and measurement of sound spatialisation have been strongly enhanced in last years, as nowadays spatialisation is considered quite important during design of auditoria and virtual audio reproduction of sound quality in dedicated listening rooms for 3D reproduction purposes. Even though international standards like ISO 3382 require measuring some spatial parameters (i.e. LE, LF, IACC), usually only mono and binaural measurements are performed, by means of a dummy head, and rarely 3D impulse responses are measured and utilised for sound reproduction. In this paper, an innovative procedure of measuring spatial sound characteristics is presented. Furthermore, the methodology is compared with other techniques of 3D sound analysis. Moreover, the results of a wide campaign of measurements of spatial parameters among different auditoria ranging from Italy to Japan and Australia, are compared with the results of standard binaural and 3D measurements.

Brief Biography of the Speaker: The definition and measurement of sound spatialisation have been strongly enhanced in last years, as nowadays spatialisation is considered quite important during design of auditoria and virtual audio reproduction of sound quality in dedicated listening rooms for 3D reproduction purposes. Even though international standards like ISO 3382 require measuring some spatial parameters (i.e. LE, LF, IACC), usually only mono and binaural measurements are performed, by means of a dummy head, and rarely 3D impulse responses are measured and utilised for sound reproduction.

In this paper, an innovative procedure of measuring spatial sound characteristics is presented. Furthermore, the methodology is compared with other techniques of 3D sound analysis. Moreover, the results of a wide campaign of measurements of spatial parameters among different auditoria ranging from Italy to Japan and Australia, are compared with the results of standard binaural and 3D measurements.

Plenary Lecture 2

On Cognitive Robotics and Theories of Abstract Intelligence

Professor Yingxu Wang

President, International Institute of Cognitive Informatics and Cognitive Computing (ICIC)
Director, Laboratory for Cognitive Informatics, Denotational Mathematics, and Software Science
Dept. of Electrical and Computer Engineering
Schulich School of Engineering and Hotchkiss Brain Institute
University of Calgary
Canada
E-mail: yingxu@ucalgary.ca

Abstract: The cognitive robot is an autonomous robot that is capable of inference, perception, and learning mimicking the cognitive mechanisms of the brain by computational intelligence. Cognitive robots emerge based on basic studies in both natural intelligence in brain/cognitive sciences and artificial/abstract intelligence in computer/intelligence sciences. In cognitive robotics, intelligence is perceived as an ability that transforms information to behavior. Therefore, abstract intelligence (α) is the kernel and formal embodiment of general intelligence shared by both humans and cognitive robotics.

This keynote lecture presents the theoretical framework of cognitive robotics as well as their cognitive and computational intelligence foundations. Fundamental problems in cognitive robotics are formally studied on what the necessary and sufficient intelligent behaviors of cognitive robots are, and what distinguish the intelligent capabilities of cognitive robots from their imperative counterparts. Theoretical foundations of cognitive robotics are explored in the facets of cognitive informatics, neuroinformatics, abstract intelligence, cognitive linguistics, brain science, and cognitive computing. A cognitive robot is formally described based on the layered reference model of the brain (LRMB), which reveals the architectural differences and behavioral characteristics of cognitive robots. A reference model of cognitive robots (RMCR) is rigorously developed in denotational mathematics, which indicates that a cognitive robot can be formally modeled at the imperative, autonomic, and cognitive layers from the bottom up. Applications of the RMCR model are identified in humanoid cognitive robotics, advanced cognitive systems, cognitive computers, and computational intelligence.

Brief Biography of the Speaker: Yingxu Wang is professor of cognitive computing, brain science, and denotational mathematics, President of International Institute of Cognitive Informatics and Cognitive Computing (ICIC, <http://www.ucalgary.ca/icic/>) at the University of Calgary. He is a Fellow of ICIC, a Fellow of WIF (UK), a P.Eng of Canada, and a Senior Member of IEEE and ACM. He was visiting professor (on sabbatical leave) at Oxford University (1995), Stanford University (2008), UC Berkeley (2008), and MIT (2012), respectively. He is the founder and steering committee chair of the annual IEEE International Conference on Cognitive Informatics and Cognitive Computing (ICCI*CC) since 2002. He is founding Editor-in-Chief of Int. Journal of Cognitive Informatics & Natural Intelligence (IJCINI), founding Editor-in-Chief of Int. Journal of Software Science & Computational Intelligence (IJSSCI), Associate Editor of IEEE Trans. on SMC (Systems), and Editor-in-Chief of Journal of Advanced Mathematics & Applications (JAMA). Dr. Wang is the initiator of a few cutting-edge research fields such as cognitive informatics, denotational mathematics (concept algebra, process algebra, system algebra, semantic algebra, and inference algebra), abstract intelligence (α), cognitive computing, cognitive learning engines, cognitive knowledge base theory, and basic studies in software science, neuroinformatics, fuzzy mathematics, cognitive linguistics, and computational intelligence. He has published 400+ peer reviewed papers and 28 books in cognitive informatics, denotational mathematics, cognitive computing, software science, and computational intelligence. He has presented 25 invited keynote speeches in international conferences. He is the recipient of dozens international awards on academic leadership, outstanding contributions, best papers, and teaching in the last three decades. He is the top popular scholar and the author of top publications at University of Calgary in 2014 and 2015 according to RG stats.
